TEAM OSIRIS

MISSION STATEMENT:

Liquor Rush's mission is to maintain the safety of our customers by helping to eliminate the possibility of customers driving (sober or intoxicated) by providing our customers with the most professional, fast, and dependable delivery service for alcohol.

System Overview

LiquorRush is an easy to use Mobile Application that allows our Users to place orders for alcohol. Our users can easily register from the login screen by providing few personal information and most importantly, their License Identification number. After the age verification process users will be able to place orders and Liquor Rush's employee's will process the order and deliver the ordered items to our customers preferred address. On delivery Liquor Rush employee will match the License Identification number on the order with the customer's Identification.

Attributes

- Convenient – LiquorRush application allows users to place orders by pressing a few on screen options.
- Fast – LiquorRush application takes advantage of the latest Mobile operating system which allows for a freeze free user experience.
- Friendly – LiquorRush's user friendly interface allows easy navigation through the process of ordering and provides our users with an excellent shopping experience.
- Reliable – taking advantage of the memory management provided by the latest Mobile operating system, LiquorRush does not consume large system resources which helps eliminate hang ups and provides consistent functionality.
- Simple – the LiquorRush application UI consists of only the necessary selection options that are required to place an order.
- Secure – LiquorRush encrypts sensitive user data using the latest encryption methods provided by MySQL API's.

Key Features

- Customizable Delivery Time
- Frequent Order Profiles
- Touch and Voice based input
- Secure Transactions

Capabilities

Customizable Delivery Times – Users can select or request specific delivery times for placed orders, orders can be placed up to 24hrs in advance. Unless Prohibited by State Laws.

Frequent Order Profiles – Save your favorite orders in a private profile and the next time our User makes an order they can simply select a profile, time of delivery to enhance and speedup the ordering process.

Touch and Voice based input – our application uses Touch and Voice based technology to make User Experience easier during product selection and with the help of voice-to-text users can add any special instructions for orders.

Secure Transactions – LiquorRush uses Mobile Pay services such as Android Pay ©, Apple Pay © which offer a quick, easy and a secure path to payments for our Users.
